Small and **POWERFUL**

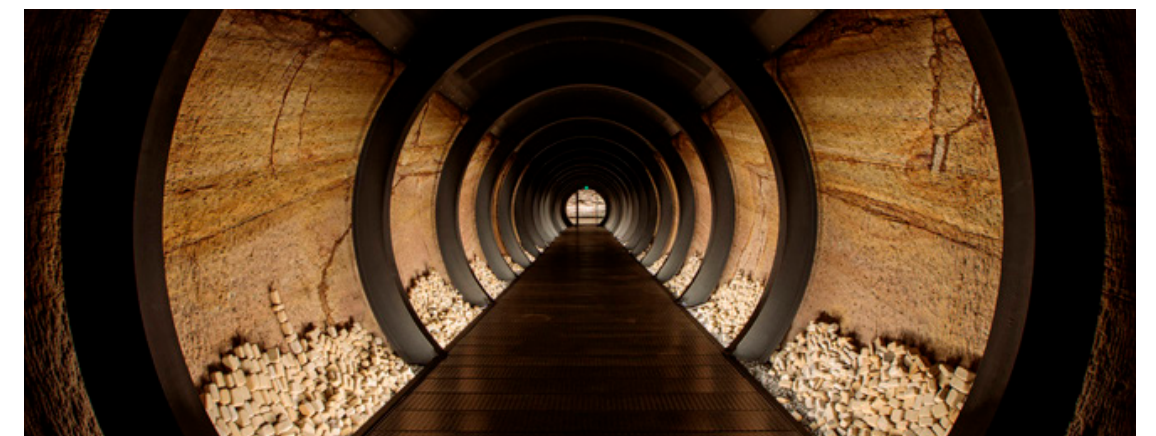

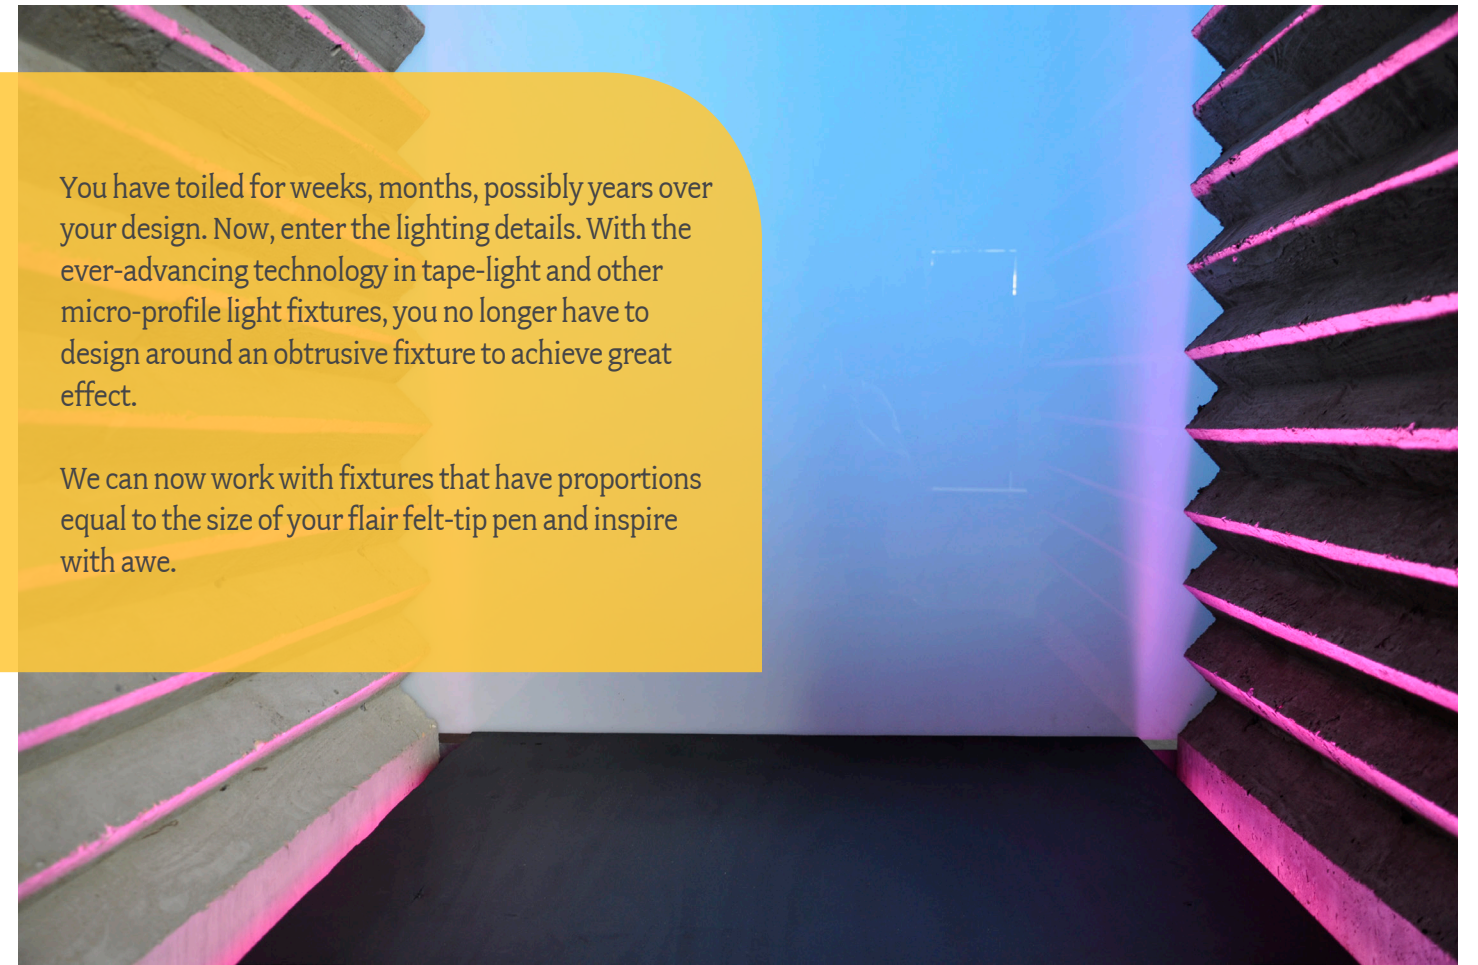

Micro-Profile Light Systems from BLS

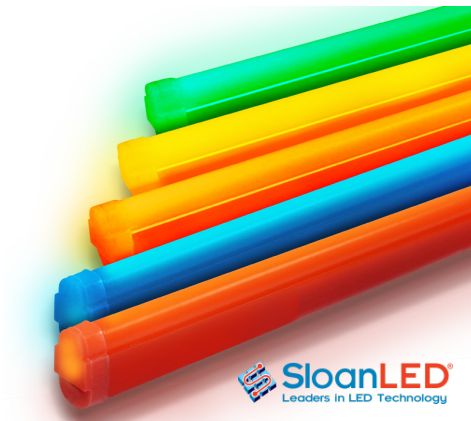

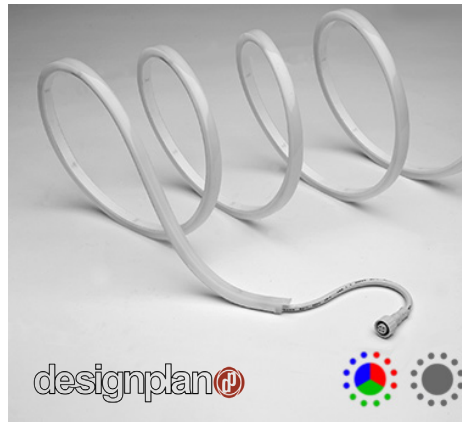

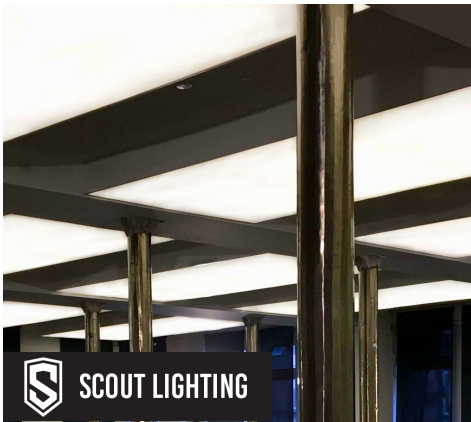

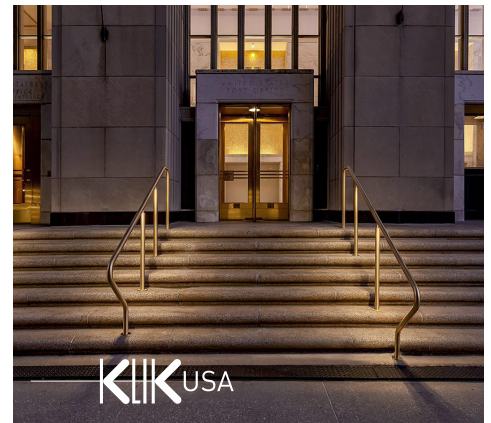

You have toiled for weeks, months, possibly years over your design. Now, enter the lighting details. With the ever-advancing technology in tape-light and other micro-profile light fixtures, you no longer have to design around an obtrusive fixture to achieve great effect.

We can now work with fixtures that have proportions equal to the size of your flair felt-tip pen and inspire with awe.

Whether you are trying to create flare by grazing a textured wall, backlighting a diffuse material, or adding a toe kick to the central staircase, BLS has the manufacturing partners to get the job done.

For more information on how these micro-solutions can best fit your project, please reach out to your Boston Light Source Teammate.

Not sure who that is?
