

SCENA

UNASSAILABLE STYLE

LUMINIS®

LIGHT THE WAY

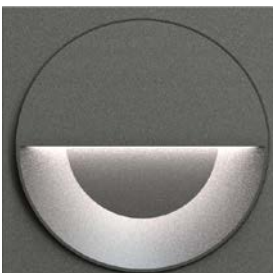

Scena brings safety and security to outdoor environments while preserving the light's soft aesthetics and architectural appeal.

UNBROKEN FLOW

Strength with style runs in the Scena family, allowing designers to achieve a total, unified effect across a landscape's various lighting elements. Surface mounts and bollards lend a modern sophistication to a design. Clean simple lines hide the fact they are impact and tamper resistant and highly durable.

ALL PURPOSE

Surface-mount rounds or squares with impact resistant glass lenses deliver uniform illumination with architectural simplicity. Install high or low on wall or even on ceiling... no additional hardware needed.

PRACTICAL APPEAL

Dark sky friendly Scena downlights illuminate staircases with crisp, uniform, efficient light while remaining comfortable on a user's eyes. Eyelid styles fits seamlessly with nearby bollards and surface mounts, maintaining the project's lighting continuity.

ADA Compliant

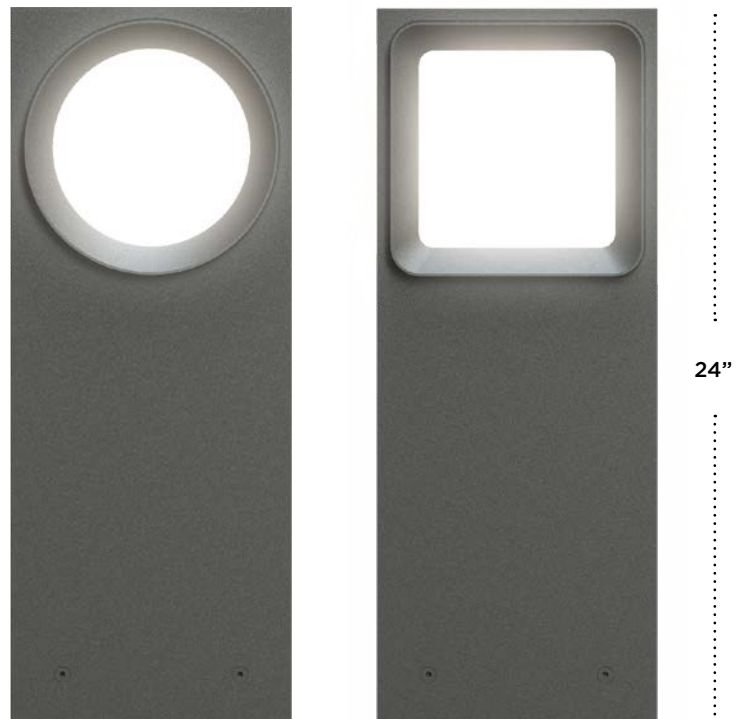

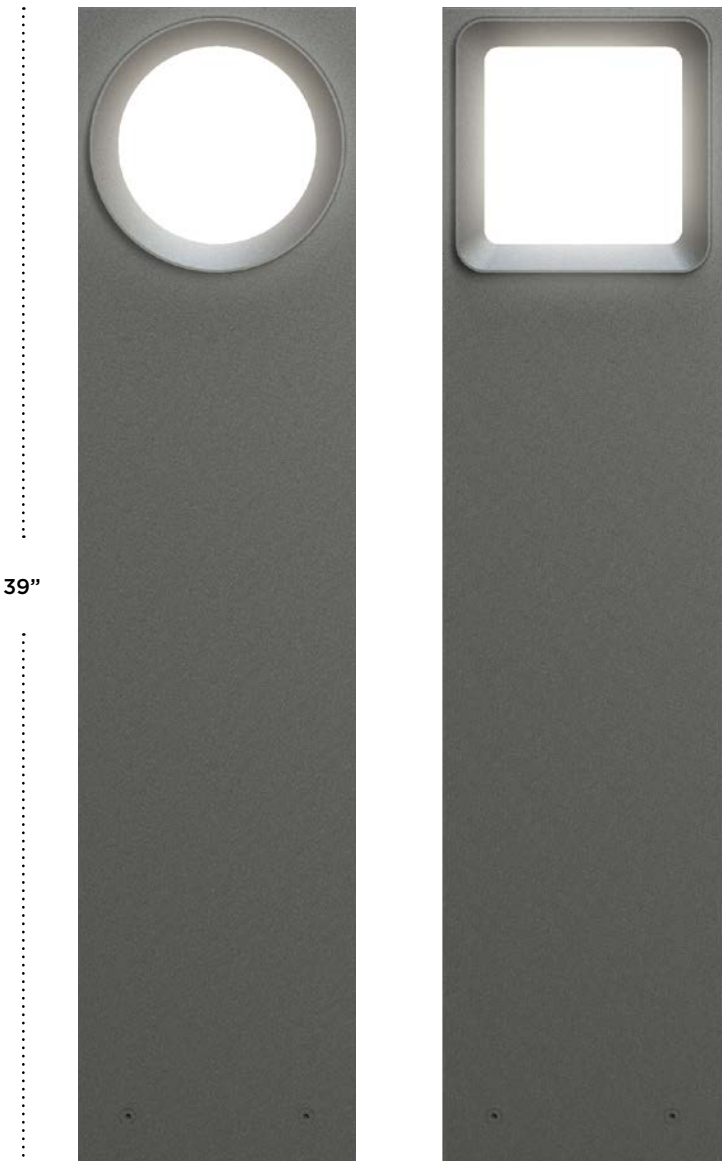

Downward light distribution with full cut-off

GROUND GAME

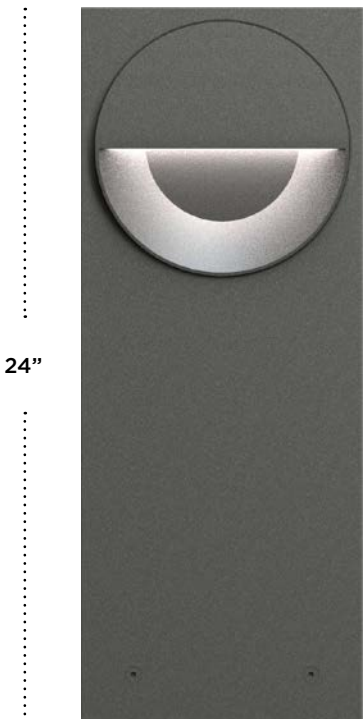

Bring Scena's clean, simple appeal to paths, walkways and public spaces with bollards. Two sizes and two geometries bring just a hint of drama to the modern landscape.

DOUBLE-DOWN

Direct bollards are essential additions to the Scena array of outdoor luminaires. With a shielded light source providing an efficient light distribution, their warm glow is restricted downwards where it is desired. While their wide beam allows for increased spacing resulting in fewer bollards required to light a space.

39"

ADDED ATTRACTION

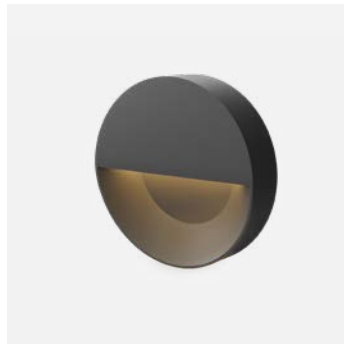

Achieve continuity of design. Banish monotony. With an amber version for turtle sensitive areas, and cross blades for a decorative touch, our range of options and finishes let you bring variety to light.

OPTIONS

Cross blades

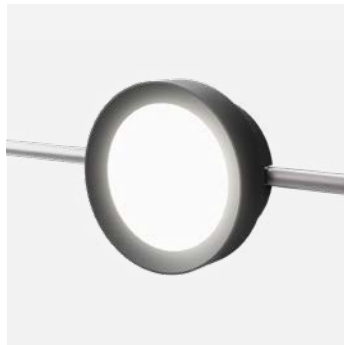

True amber LED

Photocell

Clean conduit
